

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Date: 05/12/2019

CIRCULAR

This is to inform all the 2/4 and 3/4 B.Tech CSE Students that, a Guest Lecture has been arranged on "**Analytical and problem Solving Skills-in Big Data and Data Analytics**". Hence all the students are suggested to attend the session without fail.

Resource person(s):

1. Prof Ganapati Panda, Professor, School of Electrical Sciences, IIT, Bhubaneswar
2. Dr. Suresh Chandra Satapathy, Professor and Dean, School of Computer Engg, KIIT, Orissa, India.
3. Dr. Naeem M S Hannon, Associate Professor, Faculty of Electronic Engineering University, Mara, Malaysia.

Date: 06/12/2019

Venue: Auditorium-Admin Block.

Coordinator, CSI

HOD, CSE
Head of the Department of
Computer Science & Engineering
Anil Neerukonda Institute of
Technology & Sciences
Sangivalasa, Bheemunipatnam Mandal, Dist

Guest Lecture

Topic :Big Data, Data analytics

Speaker :Prof Ganapati Panda, Professor, School of Electrical Sciences, Indian Institute of Technology, Bhubaneswar.

Professor Ganapathi addressing the audience

Professor Ganapati Panda worked as Dean (Academic Affairs) and Head, School of Electrical sciences of IIT Bhubaneswar and Dean (Administration) at National Institute of Technology, Rourkela. He was a member of Board of Governors of IIT Bhubaneswar and NIT Rourkela. He has done his Post-Doctoral research work at the University of Edinburgh, UK (1984-86) and Ph. D. from IIT, Kharagpur in 1981 in the area of Electronics and Communication Engineering.

He has started his words with a brief introduction to trends in IT industry. He said that Information Technology in India is an industry consisting of two major components: IT services and business process outsourcing (BPO). India's IT Services industry was born in Mumbai in 1967 with the establishment of the Tata Group. India's growing stature in the Information Age enabled it to form close ties with both the United States and the European Union. However, the recent global financial crises have deeply impacted Indian IT companies as well as global companies. As a result, hiring has dropped sharply, and employees are looking at different sectors like financial services, telecommunications, and manufacturing, which have been growing phenomenally over the last few years.

Head of the Department of
Computer Science & Engineering
and former head Institute of
Technology & Sciences
Bhubaneswar Dist.

With fundamental structural changes visible everywhere in the IT services due to Cloud computing, proliferation of Social media, Big data, Analytics all leading to digital services and digital economy, many of the leading companies in India's IT sector reported lower headcounts in their financial results.

The topic of emphasis has moved to Big data and its importance. The concept of big data has been around for years; most organizations now understand that if they capture all the data that streams into their businesses, they can apply analytics and get significant value from it. The new benefits that big data analytics brings to the table are speed and efficiency. Whereas a few years ago a business would have gathered information, run analytics and unearthed information that could be used for future decisions, today that business can identify insights for immediate decisions. The ability to work faster – and stay agile – gives organizations a competitive edge they didn't have before. Big data analytics helps organizations harness their data and use it to identify new opportunities. That, in turn, leads to smarter business moves, more efficient operations, higher profits and happier customers. The session ended with his enlightening speech about the importance of Big data analytics.

Guest Lecture

Topic : Problem solving skills Date: 6th December 2019

Speaker : Dr. Suresh Chandra Satapathy, Professor & Dean (Research),
School of Computer Engg, KIIT Deemed to be University, Bhubaneswar
Khorda, Orissa, India

Memento presentation by Dr.R.Sivaranjani(HoD, CSE) to the speaker Dr.S.CSatapathy

Dr. Suresh Chandra Satapathy has worked in ANITS for 10 years. He pursued PhD in Computer Science and Engineering in the areas of specialization I.e., Computational Intelligence, Soft Computing, Machine Intelligence, Data Mining, Swarm Intelligence. He has 25 years of teaching experience and 10 years of research experience.

He has started his speech with a warm introduction of his experience in ANITS, the journey he had with students who aspired to achieve their dreams. He has mentioned that "ANITS is an alternative to a NIT where students can reach their desired destination by following their paths laid by their mentors." He has emphasized the way a student has to build his personality. With the emerging technologies and growing competition, he stressed the need of creating a unique identity for every student present over there. He also said that it is the student's responsibility to build his/her career to withstand the competition. In his words, smart work and determination to succeed can only help an individual to reach his/her goals.

Addressing the audience, upcoming computer science graduates he explained the contribution of individuals to the world. He explained how fast the technology is heading towards development and how clever the

man should improve his intelligence to survive. He exemplified the day-to-day activities that a man does with the help of machine intelligence. He remarked that the man's zeal and passion towards advancement can lead to many more innovations. He continued saying, everything in this world is like a problem that has pre-defined solution, the only thing a man can accomplish is reaching the solution efficiently and quickly. There are different ways in which a problem can be solved but the ideal one receives fame and recognition. Therefore, every person who strives to solve a problem should put his/her efforts to get an ideal solution. Rigorous practice and research helps students achieve the expertise for their further inventions. He concluded his words by motivating students to achieve their goals.

Guest lecture

Topic: Analytical and problem solving skills

Speaker: Dr. Naeem M S Hannon, Associate Professor, Faculty of Electronic Engineering University Technology, Mara, Malaysia.

Memento Presentation by Professor Ramakrishna Murthy to Professor Naeem , Guest of honour.

Dr. Naeem has started his speech by extending his gratitude to the Head of the department, CSE and event coordinators. He has given an analytical problem to students to solve. He has given the answer and then explained the solution. He explained about analytical skills as analytical skills refer to the ability to collect and analyze information, problem-solve, and make decisions. These strengths can help solve a company's problems and improve upon its overall productivity and success. We use analytical skills when detecting patterns, brainstorming, observing, interpreting data, integrating new information, theorizing, and making decisions based on multiple factors and options available.

He added that being good at analysis means being able to examine a large volume of data and identify trends in that data. One has to go beyond just reading and understanding information to making sense of it by highlighting patterns for top decision-makers. One must learn more about a problem before solving it. One will have to first collect data or information before analyzing it. Therefore, an important analytical skill is being able to collect data and research a topic. He further said that attaining good analytical skills helps in attaining good problem solving skills.
