SUMMARY REPORT

Webinar on Technological Trends in IT Industry-DevOps

The Department of IT has organized a two days webinar on Technological Trends in IT Industry-DevOps from 23-06-2020 to 24-6-2020. The webinar was planned to make students aware of the new technologies that are popping up in the software world. As students are in a panic stage after being affected by the pandemic situation the department of IT thought that creating awareness of different technologies their usage and application to real world problems would create an enthusiastic environment to students and encourages them to explore these technologies in their free time that is abundantly available now comparing with regular timetable of going and coming from college, home sick etc. Anirban Pal was a great orator and a simple professional, interested in teaching and working in techM.

Introduction of the Chief Guest:

Mr. Anirban Pal, Enterprise Architect,
Tech Mahindra

He pursued Bachelor's degree in Computer Science & Engineering from M.S. University, India, M.S. in Software Engineering, BITS, Pilani – and was Univ. topper. He was a Professional excellence awardee for years in 2002, 2003, 2004, 2006, 2008, 2012, 2016, 2017, 2018. He also grabbed multiple techM awards like Pat on Back, ACE star rater, Grand Salute, etc.

Highlights of the Topic :

DevOps is a set of practices that combines software development (*Dev*) and IT operations (*Ops*). It aims to shorten the systems development life cycle and provide continuous delivery with high software quality. DevOps is complementary with Agile software development; several DevOps aspects came from Agile methodology. The speaker elucidated the history related to devops and how its existence changed the process of the systems development life cycle. He also narrated the clear difference between agile and devOps. The practical session gave a clear idea of how things are planned and executed. The total number of 100 participants are from various colleges like Gitam, GMR, Anits, Dadi, MLR.
